

CoVid Strategies

FSCS has been open consistently since March 30. We have proven safe health practices in our school community that have kept students and parents happy and healthy. We follow all recommended health and safety protocols and take them a step further with a rigorous daily cleaning routine.

The K-2 children interested in this program have been together in a stable group since May/June. The families have demonstrated great respect in following our health procedures and have been faithful partners with our staff every step of the way. Open and honest communication with a strong focus on everyday details, has been crucial to this process of safely moving our school forward during this crisis. It is our commitment to make choices that keep our entire school community safe.

FSCS has been a joyful place for adults and children to play, learn, grow, and feel safe during this uncertain time.
